

## Request for Waiver to NPR 1400.1 NASA Directive Procedural Requirements

<p><b>Requirement to be Waived:</b> The Office of the Chief Engineer requests a waiver to the following: NPR 1400.1, paragraph 3.4.2.3: "NIDs and CIDs expire upon the effective date of the permanent directive or 12 months after the effective date of the interim directive, whichever is earlier."</p>	
<p><b>Duration of Waiver:</b> OCE requests this waiver to extend NID 7120.99 (NID for NPR 7120.7) for the duration of the time it takes to finish the NODIS review process for NPR 7120.7, Revision A</p>	
<p><b>Rationale:</b> The Office of the Chief Engineer (OCE) requests a waiver to the expiration of the NID for NPR 7120.7. Additional time is required to ensure NPR 7120.7 is synchronized with NPR 7123.1, for which a revision is under draft, and the final changes to NPR 7120.5, which is currently in the final signature cycle. OCE anticipates release of NPR 7120.7A on June 2, 2013.</p>	
<p>No conflicts with other requirements have been identified.</p>	
<p><b>Necessary to Achieve the Underlying Purpose of the Requirement:</b> OCE believes waiving this requirement will not undermine the purpose of the requirement. The one-year term of NASA Interim Directives is designed to ensure that the interim requirements are vetted and integrated as appropriate into an NPD or NPR in a timely manner. The process to do so has been underway since before the NID was posted and continues to proceed as quickly as possible to resolve policy issues and thoroughly vet proposed policy changes to achieve coherent Agency policy.</p>	
<p><b>Other Considerations:</b> This request for waiver does not require a waiver to environment, safety, health, or security. It does not increase risk.</p>

\*This waiver request is approved on the condition that revisions to NPR 7120.7 are made to incorporate the language from NID 7120.99 are entered in NODIS for the February schedule for official review no later than February 12, 2013. Placing NPR 7120.7 on the February schedule will enable it to be approved in June 2013, thereby meeting the proposed release date.
